SoftDev

The ESRD Data Experts

Since its founding in 1999, SoftDev has continuously delivered services to the CMS ESRD Program. From developing the first patient registry to performing data quality and helpdesk services to our current work enhancing the ESRD Quality Reporting System (EQRS), SoftDev has remained steadfastly engaged in assuring that the best interests of ESRD patients, providers, and CMS are served.

Why Choose Us ?

Intelligent

Smart solutions stemming from dedicated people who believe in the ESRD Mission

Insightful

Business rule knowledge applied with critical insights regarding the ESRD Stakeholder community

Innovative

Meaningful innovation that delivers long term impacts, not short term fixes

Trusted ESRD data begins and ends with SoftDev.

Our Team

Our ability to deliver high quality services to this program has been reliant upon our incredible staff and their ever-expanding expertise. Currently, SoftDev houses the greatest knowledgebase surrounding ESRD data, program and policy rules, both current and past, in the country. We provide a culture that encourages our team to challenge where they see things could be done better, allowing them to best harness and apply their expertise. As a result, CMS and stakeholders around the nation have come to rely on our team as a human source of truth.

"Data and technology as a tool to connect people and improve lives is my passion."

Michael Kennedy, PhD
Chief Data Officer / ESRD Program Director
